

PupSTEP + Plus Care & Use Guide

Thank you for purchasing the PupSTEP + Plus Pet Stairs. These lightweight stairs are an excellent choice for helping small to medium-sized pets access their favorite places.

CAUTION: The PupSTEP + Plus stairs are intended for small-medium size pets only! Not intended for human use or for carrying heavier loads. Please follow this guideline strictly!

ASSEMBLY:

Step one – position the back leg in the “locked” position: Simply swing out the back leg section (which is folded under the main stair section) until both of the “locking tabs” are engaged in their respective windows in the “locking rib” section. To ease the engagement of the locking tab into the window, press down gently on the “button” on the locking tab arm.

Step two – attach stair treads: There should be four adhesive-backed tread covers included with your stairs. Working one step at a time, peel the white paper backing off each tread piece* and press firmly into the recessed area on each plastic step. Hold pressure for a few seconds before moving to the next piece. Repeat until all four tread pieces are installed. Your stairs should now look like the image on the carton.

To help separate the white paper backing, fold the tread piece sharply, pinch between thumb and fingers, and rub **firmly back and forth several times. Unfold the tread and observe the “wrinkles” formed in the white backing material. Pull up on the edge of the backing at the wrinkles to remove (see image at right).*

Step three – attach non-slip feet (optional): Attach the non-slip feet only if the stairs will be used on a slick surface, such as wood flooring. Peel the backing from each piece* and press firmly into the recessed area at the corners on the underside of the stairs. Repeat for all four corners.

**To help separate the white paper backing from the adhesive on the non-slip feet, sharply fold back one corner of each foot and carefully peel off the white paper backing.*

Training: Many pets will take to the stairs immediately, while others will require patience and gradual training. Try placing treats on the steps to encourage your pet to climb. Covering the stairs with something familiar, like a favorite blanket with treats placed on top can also help pets overcome their hesitation. If your pet becomes anxious while training, take some time off and let them learn to use the steps at their own pace.

Storage: The PupSTEP + Plus can be re-folded into the closed position for storage or travel. To do this, simply press the release “button” located on both locking tabs located on the upper part of the back leg (refer to figure at top).

Cleaning: Promptly wipe up any foreign matter or liquid with a damp cloth or sponge.

Warranty: The PupSTEP + Plus is warranted to be free from defects in materials or workmanship for a period of one (1) year from date of purchase. A copy of the original sales receipt is required for warranty issues.

SOLVIT Products is dedicated to offering innovative solutions to improve pets’ quality of life. Please feel free to contact us with any questions, comments, or warranty issues. Thank you for your purchase!
