

Copy points for SOLVIT Products Vehicle Safety Harness (four sizes, Model# 62294-62297)

Updated Jan, 2007

1. Use of a vehicle safety harness improves safety by reducing potential distractions for the driver.
2. Fully-padded, fleece-lined vest provides superior comfort and safety
3. Unique, shock-absorbing design protects pets during sudden stops
4. Heavy duty steel components at all load-bearing points - no plastic buckles like others use
5. Straps and vest material are made from strength-rated materials for safety and peace of mind.
6. Easy to load/unload pets and fits ALL vehicles
7. Integrates with vehicle's seat belt tensioning device to provide range of motion while traveling, but locks during sudden stops
8. Four sizes available: Small fits pets 6-25 lbs; Medium fits pets 20-55 lbs; Large fits pets 45-85 lbs; Extra Large fits pets 60-120 lbs.
9. One year warranty.

Sample write-up:

The Solvit Pet Vehicle Safety Harness is designed with pets' safety and comfort in mind. Heavy-duty straps attach to a fully-padded, fleece-lined safety vest, and only FULL METAL connectors are used at all load-bearing points - no plastic buckles here like others use.

The safety leash is made from a special material that is strength-rated, but provides a slight amount of stretch to absorb shock in the case of a sudden stop. The safety leash integrates with the vehicle's seat belt tensioning device, thus providing range of motion while traveling, but in the case of a sudden stop it locks in place to keep pets secure. This design also makes it easy to load and unload pets, and installs easily in ALL vehicles.

Use of a vehicle safety harness improves safety by reducing potential distractions for the driver.

The Vehicle Safety Harness is available in four sizes: the Small fits pets from 6-25 lbs; the Medium fits pets from 20-55 lbs; the Large fits pets from 45-85 lbs; and the Extra Large fits pets from 60-120 lbs.

The fleece-lined vest is also washable. One year warranty.
