- Weight of trailer = 34 lbs; weight of stroller kit = 8 lbs
- One year warranty

Sample write-up:

The Solvit Deluxe Track'r™ Pet Bicycle Trailer is a great way to maintain an active lifestyle with your pet. Leashing your pet to a bicycle is inherently unsafe for pets and owners alike – the Track'r trailer solves that problem and your pet will love the ride. It's also great for older pets or those with joint problems.

Constructed from heavy-duty polyester material with waterproof floorboard on a steel frame. The front door on the trailer includes a zippered, mesh screen layer, and a zippered, vinyl layer to block wind and weather. Use them in different configurations depending on riding conditions.

Pets load easily through the zippered, rear door. The safety leash and removable, washable cushion keep pets secure and comfortable on long rides. Includes two storage pockets on the sides plus a roomy mesh pocket on the roof to hold all your gear.

The Track'r assembles quickly and easily with no tools and folds down for easy storage. A universal bicycle hitch is included and extra hitches are available (sold separately).

Want to go on a long walk or jog, but not sure your pet can make it all the way? Convert the Track'r Trailer into a stroller with our easy-to-install Stroller Kit – includes a handlebar and 16-inch swiveling wheel. Converts from Trailer to Stroller and back in less than two minutes.

The dimensions of the “cabin” on the Large Trailer are 33” x 22” x 26”. When fully assembled, the overall trailer dimensions (including wheels and attachment arm) are 55” x 28” x 36”. With the stroller kit attached, the full dimensions are 60” x 28” x 40” (the handle is 40” above the ground). The wheel size on the Large is 20" and it is suitable for pets up to 110 lbs. The trailer weighs 34 lbs and the stroller kit adds 8 lbs.

Solvit offers a one year warranty against defective materials and workmanship on this item.
